

MOHAMMAD HANIF BIN SAIPUL BAHRI

Address: Puncak Alam, Selangor

Email: hanif.saipulbahri@gmail.com

No. Phone: 012-2363474

LinkedIn: <https://www.linkedin.com/in/hanif-saipulbahri-5a4637311/>

SUMMARY

Electronic Engineering graduate with hands-on experience in system administration, Oracle databases, Linux server management, and software development. Experienced in Power BI, React, Spring Boot, MongoDB, MySQL, and Python through industry internships and award-winning engineering projects. Passionate about building scalable IT solutions, cloud technologies, and intelligent monitoring systems.

EDUCATION

Bachelor's in Electronic Engineering with Honours (Computer)

March 2024 – July 2026

University Tun Hussien Onn Malaysia (UTHM)

Current CGPA: 3.70

Diploma in Electrical Engineering

August 2021 – January 2024

University Tun Hussien Onn Malaysia (UTHM)

CGPA: 3.46

WORK EXPERIENCES

Technician Assistant, GoApps Technology

November 2025 - Present

- Assisted with system upgrades, patches, and configuration changes to maintain optimal performance and compatibility.
- Perform regular data backups and ensure recovery procedures are in place to protect critical information.
- Support end-users by identifying and resolving hardware and software problems efficiently.
- Implement preventive maintenance to reduce system failures and enhance uptime.

Internship, RIZQ Technologies

July 2025 – October 2025

- Assisted in setting up Oracle Restart for a client database (UNIMAP).
- Assisted in restoring Data client using RMAN method.
- Oracle certificates.

Internship, GoApps Technology

July 2023 - February 2024

- Diagnose and resolve server and system issues promptly to minimize downtime and ensure seamless operations.
- Collaborate with the team to implement improvements, enhance performance, and support the company's IT infrastructure goals.
- Monitor and maintain server and system performance, ensuring security, reliability, and scalability.

SKILLS

Programming & Development: Java, Python, JavaScript, HTML, CSS, SQL.

Frameworks & Technologies: Spring Boot, React.js, RESTful APIs.

Database: Oracle Database, MySQL, MongoDB.

Operating Systems & Server Administration: Linux, Windows Server, Server Setup & Configuration, System Administration.

Tools & Platforms: Git, GitHub, Visual Studio Code (VS Code), Android Studio, Postman, SQLyog, Arduino IDE.

Engineering & IoT: Arduino, ESP32, Sensor Integration, Electronic Troubleshooting, Circuit Testing.

Technical Skills: Database Administration, Data Migration, System Troubleshooting, Hardware & Software Support, Network Fundamentals.

Microsoft Office: Microsoft Word, Microsoft Excel, Microsoft PowerPoint.

Soft Skills: Teamwork & Collaboration, Communication, Problem-Solving, Critical Thinking, Time Management, Adaptability.

Languages: Malay, and English.

PROJECT

1. **GREENSENSE** – International Research and Innovation Symposium Competition (RISE) UTHM 2026.
Technologies – ESP32, Sensor, Power BI, MySQL, Python, LSTM, and SVM.
Responsibilities – Developed interactive dashboard, developed RESTful APIs using PHP, Designed MySQL database, implemented machine learning prediction using LSTM, developed water quality classification using SVM, and Integrated IoT sensors with cloud database (Hostinger).
2. **Smart Parking Management System** – Gold Award in IDP Showcase UTHM 2026.
Technologies – ESP32, Sensor, Python and Firebase.
Responsibilities - Developed parking reservation system, built admin dashboard, implemented booking management, and designed responsive UI.
3. **AI Smart Traffic Light for Ambulance Priority** – Gold Award and Top 5 Award in RISE UITM 2026
Technologies – ESP32, ESP32-CAM, Python, Roboflow.
Responsibilities - Developed an AI-based traffic light system to detect ambulances using a camera. Programmed the traffic light to automatically turn green for the ambulance's route upon detection.
4. **Event Booking System** – Project Java Stack AI
Technologies – React, Spring Boot, and MongoDB.
Responsibilities - Developed an online event booking system, built admin dashboard, implemented booking management, Created REST API, and Designed responsive UI.

ACHIEVEMENT

- **Gold Award** – International Research and Innovation Symposium Competition (RISE) 2026, GREENSENSE: Smart Hydroponic and Aquaponic System with Interactive Dashboard for Water Quality Monitoring, LSTM-Based Prediction, and SVM-Based Classification.
- **Gold Award** – Integrated Design Project (IDP) Showcase Day, Semester 1 UTHM (2025/2026), Development of a Smart Parking Management System for Real-Time Parking Slot Availability.
- **Gold Award** – International Research and Information Science EXPO (RISE) UITM 2026, AI Smart Traffic Light for Ambulance Priority (Tertiary Science and Technology Innovator).
- **Top 5 Award** – International Research and Information Science EXPO (RISE) UITM 2026, AI Smart Traffic Light for Ambulance Priority (Tertiary Science and Technology Innovator).
- **Silver Award** – Diploma Project Exhibition 2023 Development of a Differential Drive Robot Using Arduino.

CERTIFICATION

- **Oracle Autonomous Database Cloud 2025 Certified Professional**
- **Oracle Data Platform 2025 Certified Foundations Associate**
- **Oracle MySQL HeatWave Implementation Certified Associate (REL 1)**
- **Certified Full Stack Java with AI** – Completed training in Full Stack Java Development using Spring Boot, React.js, REST APIs, MongoDB, and AI integration.
- **Certificate of Achievement** – Data-Driven Decision Making: AIoT and V-ONE Data Analytics Perspective
- **Certificate of Proficiency** – CA1C Fiber-To-The-Home (FTTH) Indoor Installation and Testing
